

WIN THIS CLASSIC 1966 CHEVY CORVETTE STINGRAY CONVERTIBLE

Corvettes have always meant power and performance, and in 1966, another chapter in the car's history would be introduced—the potent 427-cubic-inch, 425-hp V-8 fuel injected is fed by a single 4-barrel Holley carburetor. Sharp rally red Corvette fitted with numbers matching 425-hp V8!

Optioned with 4-speed transmission, power steering, power brakes, side exhaust, aluminum wheels, and auxiliary hardtop.

"Driving the car on an unrestricted proving ground road is a memorable experience," wrote the testers for the Car and Driver in their November 1965 issue. "It accelerates from 0 to 100 in less than 11 seconds—faster than a lot of very acceptable cars can get to 60."

Always stored in a climate-controlled environment, and never driven in inclement weather, it makes for an excellent collection piece with extremely low miles! This is an excellent opportunity to win a beautiful, number's matching Corvette in a very favored color combination!

Polished and shine like new, this car received a National Corvette Society "Top Flight" Award!
